

Expertise for Renewable Energy

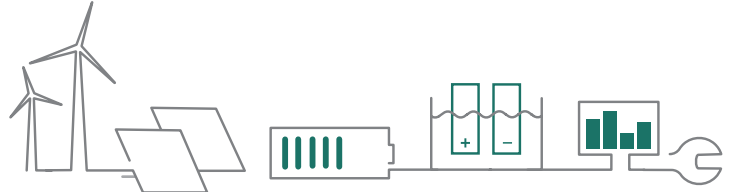

Your strong partner for the clean energy transition,
locally embedded and globally linked.

**ABO
WIND**

Comprehensive Know-How

Since 1996, ABO Wind has specialised in the development and construction of renewable energy projects. The company's in-house specialist departments provide all steps of development and implementation: from site assessment, planning, engineering, and financing to construction, grid connection, and operational management.

Wind | Solar | Battery | Hydrogen | Operations & Maintenance

ABO Wind implements wind and solar farms as well as hybrid energy systems and green hydrogen projects.

A Trusted Partner for your Project

> 1,000 employees

> 5 GW
developed
and sold

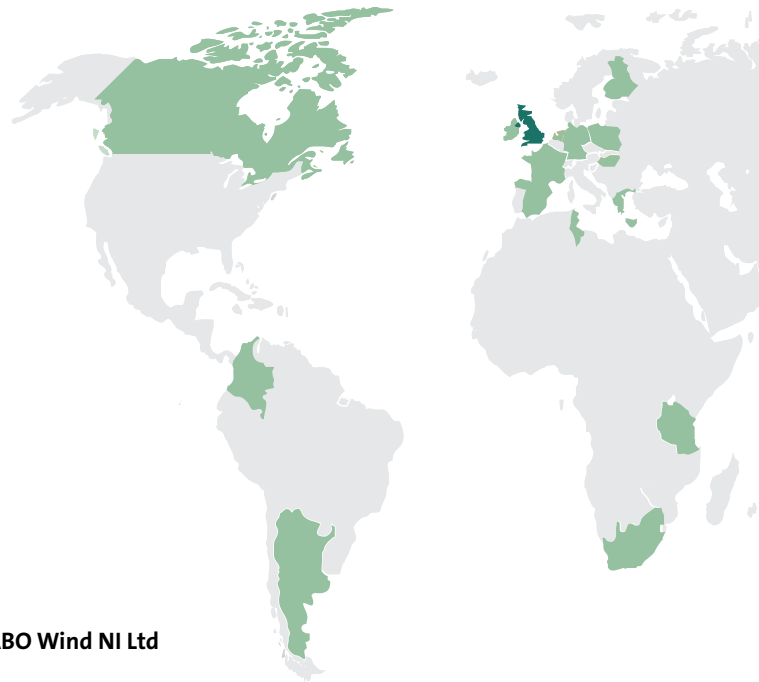

> 21 GW in
development

As a pioneer of renewable energies, our competent experts provide high-quality services and find creative solutions even for complex grid issues, construction challenges or regulatory restrictions. Banks, landowners, and communities appreciate our transparent and professional work.

Locally embedded and globally linked

Internationally, ABO Wind is active in 16 countries. Our local development team in the UK maintains close relations with local stakeholder, landowners, and authorities. With an annual project volume of around 500 million euros, ABO Wind is one of Europe's renowned renewable energy companies.
