

Who is ABO Energy?

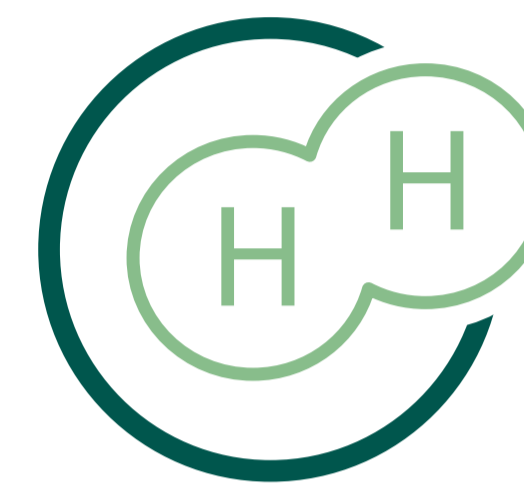

Wind Energy

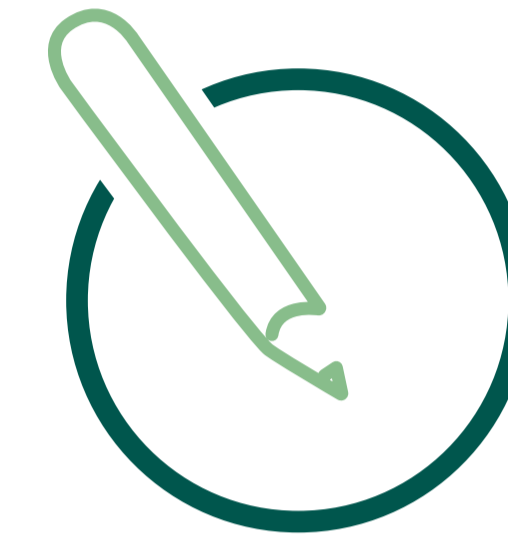

Solar Energy

Battery Energy Storage

Green Hydrogen

Project Development

Realisation

Experience

- ABO Energy is a renowned, worldwide project developer in the renewables industry with nearly 30 years of experience. The applicant, Woodheads Energy Limited, is part of the ABO Energy Group and is managed by our Scottish-based team in Falkirk.
- We have been operating in the UK since 2010, working on a diverse portfolio of projects, having achieved planning consent for over 550MW of renewable energy schemes.

Expertise

- We are part of the ABO Energy group, founded in 1996, headquartered in Germany and active on four continents. We bring global expertise, and in-depth local knowledge to all our projects.
- Our team has expertise covering all phases of solar farm and battery energy storage development, from site selection, technical design, planning and financing, as well as construction, and operations and maintenance. This experience will be utilised in developing our proposal for Woodheads Energy Park.

Consultation

- We recognise the importance of neighbours and the local communities surrounding our projects. We understand that Woodheads Energy Park will become part of the local environment, so we design our projects to minimise impacts where possible, and we manage construction to minimise inconvenience to local people.
- The local community is a vital partner in the development of our final proposals, so we welcome feedback during this period as we refine our plans. Our event will provide an opportunity to gain information about the project and to provide feedback before a finalised application for consent is submitted.
